

Pragadeesh Elangaivendhan

Software Engineer

Chennai, India | [LinkedIn](#) | +91-9025244487 | pragadeesh.e12@gmail.com

Professional Summary

Software Engineer with experience building scalable enterprise applications, distributed systems, and REST APIs using Python, Django, React, and TypeScript. Proven track record of delivering production-grade features, improving platform reliability, resolving critical production incidents, and developing automated testing solutions in Agile environments. Strong foundation in software engineering principles, system design, debugging, and cross-functional collaboration.

Technical Skills

- **Languages & Backend** : Python , SQL, C, C++, Kotlin, JavaScript, TypeScript
- **Frontend Development**: React, TypeScript, HTML, CSS, JavaScript(ES6+)
- **Backend & Distributed Systems**: Django, REST APIs, GraphQL, gRPC, Celery, Kafka
- **Databases**: MySQL, Relational Databases, MongoDB, Redis, Database Schema Design
- **Testing & Automation**: Karma, Jest, Python unittest, Integration Testing, API Testing, Debugging & Root Cause Analysis, Test Case Design
- **Tools & Practices** : Git, Agile Methodologies, Scrum
- **AI & Emerging Technologies**: LangChain, RAG, Hugging Face, XGBoost, ChatGPT, GitHub Copilot, vector DB

Professional Experience

Software Engineer, Udemy | Chennai | 2025 – Present

- Designed and implemented India-specific GST taxation workflows for course purchases, integrating payment vendors including Adyen and Stripe, UPI payment methods, and Taxamo tax services to ensure accurate tax calculation, regulatory compliance, and seamless transaction processing.
- Developed and shipped enterprise B2B learning features including goal-setting systems and learner monitoring dashboards used by 50+ enterprise customers, improving learner visibility and contributing to 5–10% MAU growth.
- Designed, developed, tested, and deployed scalable backend services and REST APIs using Python and Django, following code review, unit testing, and software engineering best practices.
- Designed, developed, and delivered the Regional Learning Path feature for the Japan market initiative end-to-end using React, TypeScript, Python, and Django, enabling localized learning experiences that achieved 12K enrollments on launch day, 13K+ total enrollments, and contributed to a projected revenue growth of \$2.7M.
- Contributed to the development of AI-powered course search capabilities, gaining hands-on experience with Retrieval-Augmented Generation (RAG), GPT-based models, prompt engineering, and AI workflows to improve search relevance and content discovery.
- Collaborated with product managers, designers, and stakeholders to deliver end-to-end solutions in Agile Scrum environments.
- Contributed to testing, debugging, monitoring, and production support across enterprise applications.
- Participated in peer code reviews, testing activities, debugging, and defect resolution while maintaining high standards for code quality and reliability.

Internship Experience

Software Engineer, Udemy | Chennai | 2024 Jun – 2024 Dec

- Worked on enterprise translation pipeline systems and localization initiatives for international markets.
- Developed learner progress dashboards to improve organizational learning visibility and analytics.
- Developed and maintained automated test suites using Karma and Jest, improving regression coverage and software quality for enterprise applications.
- Participated in defect investigation, debugging, test case validation, and release verification activities.

Project

7 days user Journey | Chennai | 2024 Dec → Udemy hackathon

Technologies: Python, Django, React, TypeScript, REST APIs, MySQL

- Identified a significant learner drop-off trend within the first 7 days of account creation through user engagement and retention analytics.
- Designed and developed a gamified 7-day onboarding journey to improve learner engagement, featuring daily learning objectives, progress tracking, achievement badges, and milestone-based rewards.
- Built scalable backend services and REST APIs using Python and Django to manage journey progression, badge eligibility, reward distribution, and user activity tracking.
- Developed responsive frontend experiences using React and TypeScript, enabling real-time progress visualization and personalized learning recommendations.

Predict.it | Chennai | 2026 – Present

Technologies: Python, Django, React, TypeScript, REST APIs, Supabase, Huggingface, XGBoost, GitHub Workflow

git → <https://github.com/pragadeeshe12-ops/Predict.it>

- Trained and optimized XGBoost machine learning models using historical stock market data to predict future price ranges and market trends.
- Implemented automated data pipelines to collect and preprocess the latest stock market data for model retraining and performance improvement.
- Integrated Hugging Face model hosting to manage model versioning, deployment, and inference workflows.
- Built an automated MLOps pipeline using GitHub Actions to retrain XGBoost models with updated stock data and deploy the latest model versions to Hugging Face.

Education

- **B.Tech in Electronics and Computer Engineering**
 - Pass-out : 2024
 - Srm Institute of Science and Technology
 - CGPA : 8.9/ 10
- **Higher Secondary Education (Class XII)**
 - Pass-out : 2020
 - ST.Joseph.Met.Hr.Sec.School
 - Percentage : 76%
- **Secondary Education (Class X)**
 - Pass-out : 2018
 - ST.Joseph.Met.Hr.Sec.School
 - Percentage : 88.4%
